In your opinion how successful is this building in terms of its design quality, on a scale of 1-5? (1 = least successful, 5 = most successful)

Which of these key characteristics make this building successful?

Mentimeter

21 — Architectural features (e.g., porches, windows, roof style/pitch level of detail, trim, articulation)

10 — Colors and materials

18 — Massing and modulation (e.g., projections, recesses, upper-story step-backs, ground-floor pedestrian-scale, etc.)

2 — Orientation/placement of entries (orientation, frequency, and/or style of entries)

7 — Yard depth/setback (distance between building and roadway)

14 — Landscaping in setback areas

4 — None – Not Successful
